PROFESSIONAL SUMMARY

Senior Full Stack Developer with 4+ years building and shipping production web applications across the full stack. Strong with modern frontend and backend frameworks (Nuxt, Vue, Laravel) and experienced in REST and GraphQL API design, real-time features, third-party integrations, and database design. Comfortable owning features end to end, from architecture and APIs to UI, on products serving large user bases.

PROFESSIONAL EXPERIENCE

Full Stack Developer · eGrow Automations, Marrakech

Jun 2025 – Present

[v2.egrow.com](#)

- Engineered a visual, Zapier-style automation builder enabling users to compose unlimited workflows with triggers, conditions, filters, actions, and loops, applicable to any use case across any domain.
- Built a system for creating integrations by defining their connections, modules, procedures (lists), and webhooks, enabling new third-party services to be added without core changes.
- Architected the platform with a Laravel 12 REST API and Nuxt 4 frontend, delivering a responsive no-code interface backed by a scalable execution engine.
- Built a high-throughput background processing system using Redis-backed queues and Laravel Horizon, reliably executing thousands of concurrent automation jobs in real time.

Full Stack Developer · eGrow, Marrakech

Oct 2023 – Present

[app.egrow.com](#)

- Built an all-in-one operations platform for e-commerce merchants to manage orders, products, stock, shipping, and end-to-end fulfillment from a single workspace.
- Developed automated shipping-company order insertion plus real-time parcel-status and order tracking, eliminating manual coordination across carriers.
- Engineered a shared team inbox unifying WhatsApp, Instagram, Messenger, TikTok, and email, supporting multiple accounts per channel routed into one collaborative inbox.
- Used WebSockets to keep order status, inbox conversations, and stock in sync across the team in real time.

Nuxt 4

Laravel 12

GraphQL

WebSockets

Tailwind CSS

Full Stack Developer · Beloud, SafeApps

Sep 2022 – Sep 2023

- Built the full stack of a social news platform with Nuxt.js and Laravel, handling architecture, API design, and UI.
- Integrated AI-based content suggestions and personalization to show users more relevant stories.
- Added live comments, in-app messaging, and breaking-news alerts using WebSockets.
- Built push notifications for web and mobile to keep users updated.

Full Stack Developer · Staff Platform, SafeApps

Oct 2021 – Aug 2022

- Built the internal staff platform for the "Breaking News" app (50M+ downloads) with Vue.js and Laravel, used to manage app content and user-generated content.
- Developed moderation tools for reported ads, news, comments, and users, plus a ticketing system for handling user problems.
- Implemented analytics dashboards and role-based permission controls for the staff team.
